

Traceability to Plantations

Facility: Pacific Inter-Link Sdn Bhd (PIL)

Period: 2022

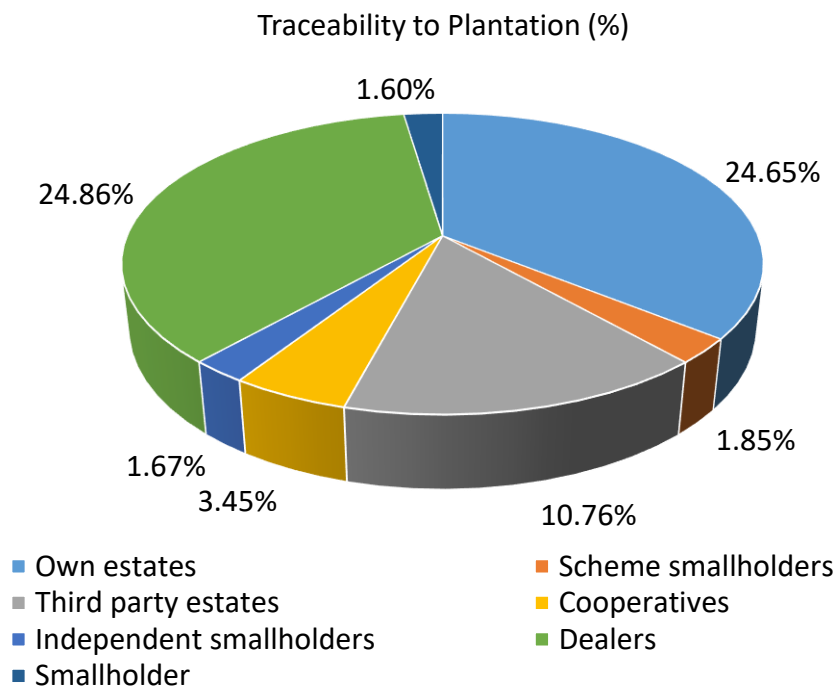

Pacific Inter-Link Sdn Bhd is 65.29% traceable to plantation.

PIL sources crude palm oil (CPO) from our sister and third party refineries for trading purpose. PIL do not have commercial relationship with mills and rely on its supplying refineries for traceability to plantation information. Sources of fresh fruit bunches (FFB) supplied to the mills which in turn supply crude palm oil (CPO) to refineries that PIL source, are made up of:

- I. Estates – estates owned by the mills and third-party estates
- II. Smallholders – scheme/plasma and independent smallholders that supplies FFB directly to our supplying mills
- III. Dealers – who source FFB from various origins

In 2022, 10.22% of our supplying mills sourced FFB from their own plantations only while 29.57% of mills sourced FFB from third party plantations only. Remaining 60.22% of mills sourced from both own and third party plantations. Third party plantation refers to various sources such independent plantations, smallholders, cooperatives and dealers.

In terms of volume of FFB traceable, 24.65% was sourced from mill’s own plantation, 10.76% from third party estates, 1.85% from scheme smallholders, 1.67% from independent smallholders, 1.60% from Malaysian smallholders, 3.45% from cooperatives and 24.86% from dealers.

We consider the source of FFB as traceable when the following information is provided by the supplying mills.
